1. ABOUT US

Our team consists of talented enthusiasts, exchange traders who united and founded a single company in order to build a valuable investment portfolio for the sake of profitable trading at digital currency exchanges. Thanks to many years of professional experience in this field (10 years and more), as well as partnership with reliable companies from all over the world, we managed to achieve great results in trading such popular currencies as Bitcoin, Ethereum, Monero, Ripple, and many others. On average, every 9 deals out of 10 are successful, while our leading traders have the success rate of 97%.

Our company's high profit margins in the area of cryptocurrency trading are associated not only with the great experience and expertise of our leading traders, but also with the powerful support of our partner analytical agencies that perform multivariate market analysis and provide us with valuable information regarding the most promising exchange deals. Smart internal money management of our company also plays a great role. Its main principle lies in the effective distribution of own and leveraged financial assets for the sake of profit maximization. VITAL-WEALTH Trade Platform company was officially registered as a legal entity in 2016 and operates in compliance with the current legislation of VITAL-WEALTH Trade Platform company. Being a compliant taxpayer, our company demonstrates its financial solvency and the ability to be a reliable investment partner for any legal or physical entity.

2. CRYPTO TRADING

Popularization of the blockchain technology and the appearance of dozens of new cryptocurrencies led to a new type of exchange trading, cryptocurrency trading, which is especially attractive for investors. Bitcoin has shown phenomenal growth, and many market experts are certain that the investment potential of this and other virtual currencies is unlimited. This strongly suggests that we should consider crypto trading to be one of the most liquid and profitable ways of investing our assets.

However, the possibility to receive stable profit is complicated by two circumstances. First, not all the investors have the knowledge necessary to trade at the exchange market independently, which is why they transfer their assets to brokerage companies for trust management. Second, it's very hard for investors to find a suitable trust management company that will be able to ensure a safe and quality service that includes convenient and quick withdrawal of funds to the e-wallets of investors, a sufficient set of tools, and a large investment portfolio for efficient trading.

Our investors can be sure that working with us is safe thanks to our legal license and regular financial audits that guarantee the appropriate use of invested funds and accuracy of accruals. Our company has united dozens of talented specialists who, having received access to wider financial capabilities, constantly master their professional skills and successfully solve the complex objectives imposed by crypto trading.

However, one should understand that profitable trading is impossible without great teamwork. Our powerful analytical service prepares detailed prognosis for traders on a daily basis, members of our financial department distribute the assets to the most promising sectors, our customer support is always in contact with our clients, helping them to solve the issues they encounter. We must also mention our software developers who work closely with the traders in order to create advanced automated trading systems that increase the number of successful deals. Since cryptocurrency trading is still attended with certain risks, we have created a reserve fund that works as an insurance of sorts, preventing financial losses. In case any force majeure events occur or the market situation is unfavorable, we will be able to return all due sums to our investors.

3. EASE OF USE

Since cryptocurrency trading is still attended with certain risks, we have created a reserve fund that works as an insurance of sorts, preventing financial losses. In case any force majeure events occur or the market situation is unfavorable, we will be able to return all due sums to our investors.

To improve our competitive and financial performance, we scaled up our financing sources thanks to the additional investments made by private individuals online. As for our investors, it provides them with greater opportunities and makes it possible to enter into an investment partnership with a reliable financial partner from anywhere in the world as long as they have Internet access. There's no need to visit company offices, no dress code, no need to be present at meetings and conferences. All our potential investor has to do is register on this site, choose an investment plan, make a deposit, and observe the regular accrual of investment dividends. Everything else will be done by our specialists, such as traders, financial analysts, economists, managers, software developers, and experts.

4. SAFETY

Our company provides access to profitable and safe investments into the exchange trading. The reduction of investment risks to the record minimum is the result of the professionalism that has shaped over the years of successful work in this field, the presence of in-house cryptocurrency trading techniques, and partnership with the largest global exchanges. We are secure against making trading mistakes thanks to the firm predictions of competent analysts that allow us to adjust our trading principles on time, smartly diversify our resources and, consequently, maintain a high rate of trading efficiency.

Moreover, we operate several currency pairs at the same time, which is why our potentially unsuccessful deals are covered by the profit from the successful deals with other cryptocurrencies. This scheme also works when it comes to a decline in the rate of an individual cryptocurrency. We possess the capabilities to predict a fast increase in the value of new cryptocurrencies, which fully covers potential losses.

What guarantees asset safety and investment returns? We have created a reserve fund that we regularly replenish thanks to which all the capital of our investors is protected in case of any potential unforeseen circumstances. Timely pay-outs of investment dividends are the foundation of the strong client trust and impeccable reputation of our company.

8. Frequent Asked Question

Do you accept customers from any country?

Yes, we accept customers from any place in the world without exception.

How can I open an account with VITAL-WEALTH?

It's quite easy. To become our member, please follow this link, fill out the registration form and click the "SIGN UP" button.

How can I access my account?

If you are a registered VITAL-WEALTH user, please follow this link, enter your username and password in the suitable fields and click the "LOGIN" button. You'll be redirected to your account automatically.

How can I change my personal information in my account?

Log in to your account and click "EDIT ACCOUNT" to go to the personal information page where you can change your data. Save the changes when all the necessary data is entered. However, you can't change your email address and payment wallets because this function is disabled for security reasons. To make such changes, you must contact us through the support form and provide your secret question/answer and new payment wallets/email address. How can I protect my account from hacking?

We place great emphasis on the safety of our members, and you don't need to worry about account security. Each account has individual protection against hacking and password guessing: after 3 wrong login attempts your account will be locked. Unlocking is possible only through your email address. We recommend using "Security Settings" as additional protection for your account.

What should I do if I can't log in to my account because I forgot/lost my password?

Click the "Password Recovery" link, type your username or email, and you'll receive your account information by email.

My account was stolen. What should I do now?

At first please use the "Password Recovery" option, and then log in to your account and change your password immediately. If this won't be enough, please contact us via support form or by email and provide your account details in full with your secret question and answer. Please contact us only from the email address you have used for registration

I sent a message to support service but didn't get any answer. What should I do?

All messages will be checked and answered within 48 hours of receipt. Please be patient while waiting for a response from our operator. Don't take any rash acts, we are able to manage any problem.

How can I make my first investment?

First of all, you need to register a new account, click the "DEPOSIT" button, enter the amount, select the payment system and click "Confirm" button.

How long will my investments be active and bring me income?

We offer unlimited investment plans, which means you'll receive income all the time while the company is doing our business. You can use the profit calculator on the main page to calculate daily and yearly profit.

How much investment can I make in a day or a month?

You can make as many investments as you want. We don't have such restrictions.

Do you charge any fee for providing your investment services?

No, we don't charge any fees. The profit we receive from our overall investments is enough for us. We don't need to charge any fees for transactions, however, payment processors may charge you with receiving fees, and we have no control over that.

Can I make a direct deposit from my account balance?

Yes, you can reinvest the balance if the amount is greater than or equal to our minimum deposit: 0.0005 BTC. To make a deposit from your account balance, simply login to your account, click the "DEPOSIT" button and select "MAKE A DEPOSIT FROM THE ACCOUNT BALANCE". We offer more favorable investment conditions for our regular users. You can find out more on the investment offer page.

What payment methods can I use to fund my account?

We operate with cryptocurrencies Bitcoin, Ethereum, Dogecoin, Bitcoin Cash, Dash, Litecoin, and payment systems Perfect Money and Payer. You can find out where to buy cryptocurrency on this page.

My deposit doesn't appear in the list of active deposits in my account. What should I do?

If you made a payment using Perfect Money or Payer and it didn't appear in your account within 15 minutes, please contact our support team with the following data: username, payment method used and transaction batch number.

If you made a payment using Bitcoin, Ethereum, Litecoin, and your transaction have at least 6 confirmations, please provide the following data: username, transaction ID and time, amount in USD and BTC/ETH/LTC and more.

I haven't received my daily earnings. What should I do now?

Each deposit is processed separately. You receive earnings for each deposit 24 hours after investing. Please wait 25 hours and check your "Financial History". If your transaction won't be added, please contact us through support form or email and provide details of your deposit.

Is daily profit paid directly to my currency account?

No, profits are gathered on your account balance and you can withdraw or reinvest it anytime.

What is the minimum and maximum withdrawal amount?

The minimum withdrawal limit with cryptocurrency is 0.0005 BTC, with Payer and Perfect money is 0.0001 BTC. There is no maximum limit.
